Examiner's Statement of Reasons for Allowance

Drawings

1. The drawings submitted have been reviewed and determined to facilitate understanding of the invention. The drawings are accepted as submitted.

Information Disclosure Statement

2. The information disclosure statement filed on 23 January 2004 does not fully comply with the requirements of 37 CFR 1.98 because: The identification umbers supplied for the non-considered items (se the crossed-out lines of the attached form PTO-1449) seem to be incorrect ad the examiner cannot identify the intended art. Since the submission appears to be *bona fide*, applicant is given **ONE (1) MONTH** from the date of this notice to supply the above mentioned omissions or corrections in the information disclosure statement. **NO EXTENSION OF THIS TIME LIMIT MAY BE GRANTED UNDER EITHER 37 CFR 1.136(a) OR (b).** Failure to timely comply with this notice will result in the above mentioned information disclosure statement being placed in the application file with the noncomplying information **not** being considered. See 37 CFR 1.97(i).

Allowable Subject Matter

3. Claims 1-20 are allowed.
4. Claims 1-20 describe a polarization transformer having a corner cube, an input light beam irradiating the corner cube and a polarization transformed output beam from the corner cube.

Art Unit: 2874

5. U.S. Patent Application No. 2003/0021519 to Zalevsky et al. describes a polarization transformer having a substrate, an input light beam irradiating the substrate and a polarization transformed output beam from the substrate. Zalevsky et al. does not describe the use of a corner cube.

6. U.S. Patent Application No. 2003/0021519 to Zalevsky et al. remains the closest prior art of record in this application. For the reasons stated above, however, Claims 1-20 herein are deemed to patentably distinguish over Zalevsky et al. and all other prior art of record.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent Application No. 2004/0228567 to Martinelli et al. and U.S. Patents Nos. 6,665,106 to Noe and 6,735,350 to Gauthier describe polarization transformers.
